MISCELLANEOUS

- Model numbers can change frequently due to manufacturer. Specific model numbers are not guaranteed. If model number changes, builder will substitute with equal quality or upgrade to a superior one.
- Builder reserves the right to make changes to the selected building materials without notice or obligation to inform the buyer. These changes must be of similar quality or higher.
- Ceiling heights, windows, doors, and room sizes may vary depending on site conditions, elevations, and options selected.
- Any contract addendum and/or change order overrides the specifications in this document

Buyers Initials: _____

- Barringer Homes Selections Cut Off Matrix provides outline for which options and selections can be selected at which stage of construction
- Builder reserves the right to deny any change order after selections have been selected with buyer & designer. Change order fees after selection period are \$250 for the first one and \$500 for each one after. This is in addition to the cost of the upgrade
- The standards mentioned in this document supersede the plans in the event of a conflict between the plans & specifications
- The selections document may indicate different finish materials that the builder or buyer has selected depending on the stage of construction. Therefore, the selections document supersedes this standards document in the event of conflict
- Refrigerator, washer & dryer are not included
- Fencing is an optional upgrade
- Owner's responsibility to maintain and replace HVAC filters per manufacture recommendations.
- New home buyer orientation much be scheduled during normal business hours with no exceptions prior to closing
- All homes include a 2-10 Home warranty.
- Barringer Homes operates on normal business hours from 9am to 5pm, Monday through Friday.

Important Client Note: Buyer acknowledges the importance of the detail this document provides as an Exhibit to the Agreement for Sale of a Home built by Barringer Homes. By signing and initialing this document, Buyer acknowledges they have reviewed, approved, and understand the Specifications for the home.

In the event a discrepancy occurs between the house plans and the specifications, the overriding document to be used to determine the correct path for construction of the house will be the Specifications.
